

Interest Group on International Human Rights Law 2023

Since the 2022 report, the Interest Group on International Human Rights Law has engaged in the following activities.

September 2022 – September 2023 Social Media Activity (twitter/X)

Through the dedicated Twitter/X account, the IG International Human Rights Law has sought to remain active and visible, through the dissemination of relevant events on international human rights law, as well as relevant pieces of scholarship.

In light of the ongoing controversies with said social media channel however and absent any objections by ESIL, the IG will likely move its social media coverage to Bluesky, as an alternative platform to foster cooperation on topics related to IHRL.
