ABOUT THE CONFERENCE

Symbiosis Conference on “Rule of Law in Context Rule of Law: Just World Order, Digital Life, AI, and Emerging Technologies” (SYMROLIC-25) is an interdisciplinary conference on the repercussion of AI, Digital Life, and Emerging Technologies to the ideals of a just world order and the rule of law. SYMROLIC’s journey began as a national conference showcasing in-house research, building on research excellence within and as an avenue for developing new ideas as well as updating research ideas with skills in 2012. It grew into international participation by 2015. This has been drawing on Symbiosis International (Deemed University)’s new impetus to thrust areas, excellence centres and innovation. The conference will be held over two days and is specially designed to discuss and deliberate on various interdisciplinary areas and core issues and suggest a way forward to upholding the Rule of Law.

SYMROLIC-25 continues our rich tradition of generating research-based ideas in our pursuit of academic excellence. A special feature of the conference will be the Plenary Session, which will focus on the repercussions of AI, Digital Life, and Emerging Technologies on the ideals of a just world order and the rule of law. Digital life and AI and emerging technologies refer to the increasingly interconnected world where our daily lives are influenced by artificial intelligence (AI) and other rapidly developing technologies, such as the Internet of Things (IoT), blockchain, augmented reality (AR), and machine learning, which are shaping how we interact with information, devices, and services around us. This year’s international conference is expected to generate 75-100 papers in different areas relating to the theme of the conference. In keeping with the goals of the Conference, the plenary session has been conceived as a meeting point for scholars and experts to discuss the issues and controversies surrounding AI and emerging technologies. The plenary is also expected to generate a robust intellectual corpus for channelling the benefits of AI and emerging technologies in our pursuit of a just world order. The Plenary Session will be addressed by eminent scholars like Prof (Dr.) Ketan Kotecha, Head, SCAAI, Prof (Dr.) Subhojit Basu, Leeds University. We are also expecting Prof (Dr.) Siobhan Mullally, University of Galway and Prof (Dr.) Patricia O Solluvan, University of California San Francisco to address the gathering at the Plenary Session.

RULE OF LAW IN CONTEXT: JUST WORLD ORDER, DIGITAL LIFE, AI AND EMERGING TECHNOLOGIES

Rule of Law is a foundational principle of a democracy that establishes accountability and fairness of legal frameworks. It creates an assurance against arbitrary usage of power, and is a cornerstone of democracy. It promotes transparency and public assent to promulgating legal power, which is an indispensable characteristic, especially in the contemporary digital age. The focus of this theme is mainly within the context of technological advancements, with the advent of various innovations in the field. These emergences have created the requirements for more exhaustive and dynamic legal frameworks that accurately reflect the scope of the digital world. With more digitalisation, there have been more challenges that pre-existing legislations and policies cannot properly resolve and address due to insufficiency.

The conference aims to explore and address the gap between the current legal framework and the ideal legal responses needed to regulate emerging technologies. Another key aspect of this theme is ensuring that these regulations align with the principles of the Rule of Law, maintaining justice, accountability, and fairness.

As technologies such as Artificial Intelligence, Blockchain, and Biotechnology continue to evolve, legal systems must adapt to govern them effectively. The various tracks of this conference will explore different aspects of this issue, both on a global and domestic scale.

SYMROLIC aims to bring together faculty members, researchers, doctoral scholars, and students to engage in meaningful discussions on strengthening the Rule of Law in the digital age. Through insightful dialogue and analysis, the conference seeks to contribute to the ongoing development of legal frameworks that can effectively address the challenges posed by technological advancements.

Eminent international scholars like Prof (Dr.) Martin Haug from University of Galway, Professor Martin Faix from Palacky University in Olomouc, Professor Ratna Kapoor from Queens Mary Unvuer, Prof Subhajt Chatterjee from University of Leeds have agreed in principle to officiate the different tracks under the conference and also evaluate the papers submitted.
